Ediz Buba

Java Developer Apprentice · Computer Engineering Student

Lyon, France / Email / LinkedIn / GitHub / Portfolio

PROFILE

Computer Engineering student at CPE Lyon and Java Developer Apprentice at Sopra Steria, with professional experience in business software development using Java and SQL. My engineering curriculum focuses on Software Development, Data and AI. Currently seeking a 9–10-week international software engineering internship between June and September 2027.

EXPERIENCE

SOPRA STERIA · SOPRA REAL ESTATE SOFTWARE
Sep. 2025 — Present
Limonest, France

Java Developer Apprentice

- Develop and integrate new features into a large-scale Java business application.
- Analyse functional specifications and translate business requirements into technical implementations.
- Build configuration screens with validation and dynamic variable insertion based on XML/XSD structures.
- Investigate defects, work with SQL data, and perform functional and technical validation.

Java · JavaScript · JSF / PrimeFaces · JSP · Struts · DB2 / SQL · Git

OKTEO · MICGEST
2024 — 2025
Arbent, France

Software Developer Apprentice

- Developed new features and maintained and improved existing application modules.
- Worked with business data using SQL and HFSQL.
- Built the ERP settings search tool, from requirements analysis through implementation, testing and validation.

WinDev · HFSQL · SQL
